# Positive Alternative

is a vision of a **new Belarus** developed through dialogue, discussions, and agreements. It is now included in the draft constitution of the new Belarus.

in draft legislation

in reform proposals

# Positive Alternative

is a [gateway to Belarus](#). It answers the question of whether it is currently possible to work with Belarusians in Belarus, considering the country's shift towards totalitarianism. The [answer is a definite YES](#).

# Positive Alternative

is a **gateway to Europe**. In the Warsaw Declaration, we stated that our goal is the Council of Europe and the European Union. To achieve this goal **we must be predictable and transparent** to our European partners and friends.

1

They need to know what the new political system of the new Belarus will look like. How elections will be organised. What economic reforms to expect. How the judicial system will function.

2

We propose to take to Belarus and to European capitals a roadmap for European integration, the core of which is a **POSITIVE ALTERNATIVE FOR THE NEW BELARUS**.

# Positive Alternative

is a **valuable time resource**. We won't have much of it. A year at most. During this time, we must successfully implement the system of separation of powers, carry out judicial system reform, and **launch an effective local government system**.
